

STRENGTH AND EFFICIENCY IN EVERY CUT

Reinforced structure and **double vertical shaft** ensure stable, accurate, and long-lasting cuts.

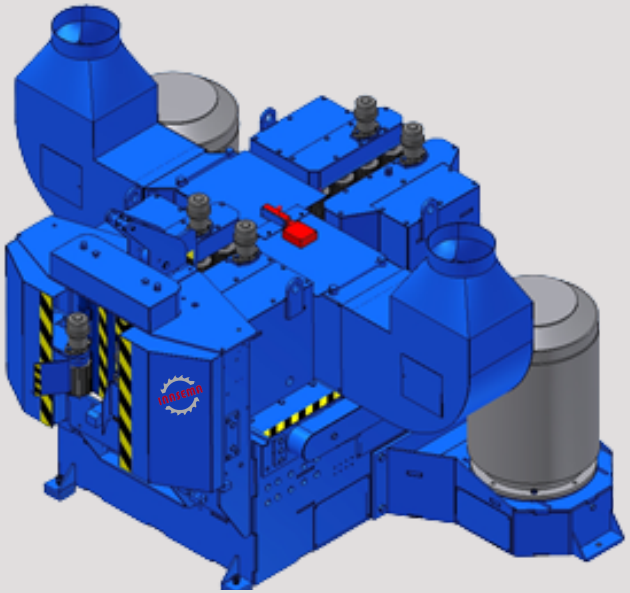

Toothed rollers with hard chrome treatment and hydraulic traction ensure a firm, continuous, and safe feed, even in **demanding environments**, delivering consistent reliability over time.

B-24N
GANG MULTI-RIP SAWS WITH ROLLER

TECHNOLOGY THAT DRIVES YOUR PRODUCTION

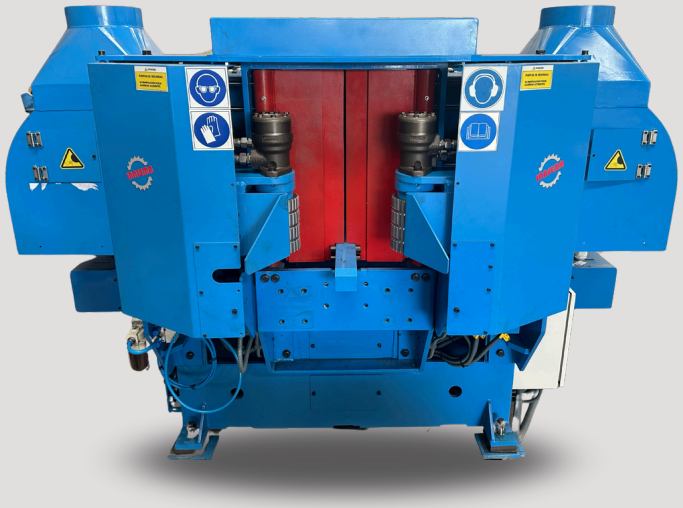

The **B-24N** redefines **performance** in **sawmills**.

Structural **robustness**, dual **vertical axis**, and **four** powered **roller trains** ensure a perfect, safe, and consistent cut.

Maximum **durability** for the most **demanding environments**.

TAKE YOUR SAWMILL

TO THE NEXT LEVEL

FEATURES THAT MAKE THE DIFFERENCE

- **Cutting height:**
  - B24N/300 → máx. 150 mm | mín. 65 mm
  - B24N/350 → máx. 200 mm | mín. 65 mm
- **Maximum** cutting **width**: 340 mm
- **Minimum** cutting **length**:
  - B24N/300 → 800 mm*
  - B24N/350 → 1000 mm*
- **Saw** blade **diameter**:
  - 300 mm (modelo 300)
  - 350 mm (modelo 350)
- Saw **motor power**:
  - From 60 HP to 150 HP*
- **Hydraulic power**: 10 HP
- **Feed speed**:
  - Up to 46 m/min (modelo 300)
  - Up to 40 m/min (modelo 350)
- **Weight**:
  - 6.000 kg*
- **Electrical connection:**
  - 3 x 380 V – 50 Hz

ADAPTABILITY AND VERSATILITY

With manual and automatic adjustment systems, the **B-24N** handles **different wood** widths and corrects irregularities for a **firm** and **continuous drive system**.

Sawdust management:

- **Decantation** system
- **Suction** system
- **Mixed** system.
